DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 6/16/2005 and 6/22/2006 are acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner considers the references cited therein.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mikhail *et al.* ('357).
4. Mikhail *et al.* discloses a catheter comprising a flow control membrane (38). The flow control membrane comprises a plurality of slits (76). The slits are substantially symmetrical about either a line of symmetry, diameter, major axis or a point. (See Figures 21-35) The flow control membrane is composed of silicone rubber. (See Column 18 Lines 46-58) The flow control membrane is taught to be shapes other than circular such as oval. (See Column 27 Lines 64-65)

5. Thus, it appears that Mikhail *et al.* disclose every element of claims 1-19.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. U.S. Patent 6,726,063 B2 to Stull *et al.*
- b. U.S. Pre-Grant Publication 2002/0,121,530 to Socier
- c. U.S. Pre-Grant Publication 2004/0,186,444 to Daly *et al.*
